B.Tech, Electronics and Communication Engineering - Data Science
Address : C1-202, Nyati Elan Phase-1, Bakori Road, near JSPM College, Wagholi, Pune

Summary

A highly motivated B.Tech student in ECE with specialization in Data Science, possessing strong analytical and programming skills. Experience in Exploratory Data Analysis (EDA), SQL, data preprocessing, and ETL processes, with a conceptual understanding of Azure Data Pipelines, Data Warehousing, Azure Analytics and AI Services. Proficient in AI/ML with a solid foundation in data-driven analytics, focused on delivering practical solutions with learning and improvement.

Education

SRM Institute of Science and Technology	2027
B.Tech · ECE with specialization in Data Science · Kattankulathur, Tamil Nadu	CGPA - 9.49/10
GD Goenka Public School	2022
Class XII - CBSE · Patna, Bihar	Percentage - 77%
GD Goenka Public School	2020
Class X - CBSE · Patna, Bihar	Percentage - 88.6%

Experience

VOIS Link	Sept 2025 - Oct 2025
Intern · Internship	Remote
- Delivered end-to-end data analytics projects under VOIS–AICTE, performing data cleaning, preprocessing, and exploratory analysis to uncover trends and correlations in large datasets. - Applied LLM-driven analysis with prompt engineering to query datasets and generate actionable insights from complex structured and unstructured data.	

Skills

Programming Languages: Python, SQL
Languages and Frameworks: NumPy, Pandas, Matplotlib, Seaborn, TensorFlow, Keras, Scikit-learn, LangChain, LangGraph, Streamlit
Tools and Technologies: Microsoft Azure, GitHub Copilot, MySQL, VS Code, Jupyter Notebook, Google Colab, Git/GitHub
Areas of Interest: Data Science, Machine Learning, Data Analytics, Deep Learning, NLP

Projects

MultimodalAI	Aug 2026
- Python, LangChain, FAISS, RAG, Ollama, Qwen3/2.5-VL, Whisper - Built a multimodal RAG platform for querying PDFs, documents, spreadsheets, images, audio, video, and code using FAISS semantic search and locally hosted Qwen LLMs. - Integrated OCR, speech-to-text, vision, and video processing to deliver real-time, context-aware responses.	
Study Planner Agent	Jun 2026
- Python, LangChain, Gemini API, HTML/CSS, Flask - Built an AI-powered web application that generates personalized study plans using the Gemini API to provide intelligent learning recommendations based on user goals and available study time.	
5×5×5 LED Matrix Display (Team Size: 3)	Jul 2025
- ESP32, HTML/TailwindCSS, LED Multiplexing, Wi-Fi - Designed and built a volumetric 3D display using 125 LEDs controlled by an ESP32, with a built-in web server to trigger 3D animations and scroll custom text messages remotely from a smartphone or PC browser.	

Netflix Data Analysis · Python, NumPy, Pandas, Seaborn, Matplotlib, LLM - Conducted EDA on a dataset of ~7,800 Netflix titles (11 features) to analyze content distribution, genre patterns, and temporal trends. - Applied LLM-assisted workflows for automated analysis, improving insight generation and supporting data-driven evaluation of global content strategy.	Oct 2025
Airbnb Hotel Booking Analysis · Python, NumPy, Pandas, Seaborn, Matplotlib, Plotly - Conducted EDA on a large-scale Airbnb dataset of 100,000+ listings to analyze booking trends and host performance. - Utilized data cleaning and preprocessing techniques, and generated visualizations to identify patterns in pricing, availability, and review metrics across locations.	Sept 2025
